Professional Summary

Versatile Information Technology and Computer Science Professional with a proven track record of delivering innovative solutions across diverse technical domains.

Extensive expertise in operating systems, high-performance computing, software development, and networking.

Key strengths include:

- Proficiency in full-stack development, graphics programming, AI integration, and computational problem-solving.
- Experience in RF & Microwave technologies, mechanical engineering, and automation.
- Expertise in leveraging cloud technologies (AWS, Azure, GCP) and advanced CS principles to drive innovation.

Dedicated to staying ahead of emerging technologies and applying them to create efficient, cutting-edge solutions that meet complex challenges

Committed to excellence and continuous improvement in all aspects of my work.

Education

University of Massachusetts Lowell, Lowell, MA

📅 2024 - 2025

Bachelor of Science in Information Technology & Computer Science

Current Status: Senior

Relevant coursework: Databases, Data Analysis, Shell Scripting, Back-End Web Development, Mobile Application Development, Networking, UNIX/Linux Systems Administration, Web Development, Software Development

Skills developed: AWS, GCP, Microsoft Azure, TCP/IP, IT Operations, Microsoft Office Suite, HTML & CSS, JS

University of Massachusetts Lowell, Lowell, MA

📅 2021 - 2023

Associate's Equivalent / Transfer, Computer Science

Relevant coursework: Data Structures & Algorithms, Operating Systems, Cloud Infrastructure, Combinatorial Logic, PCB Design, Linear Algebra
Skills developed: C, C++, Rust, OCaml, Bash, MIPS Assembly, x86, ARM, GUI Development, Mathematical Computing

Technical Skills

Programming Languages: C, C++, C#, Java, Python, Zig, Rust, Go, Assembly(ARM,x86,MIPS)
Scripting & Shell: Bash, KornShell, PowerShell
Web Development: HTML, CSS, JavaScript, TypeScript, React, Angular, Vue, Node.js, Next.js, WebAssembly
Software Development: OOP, Functional Programming, Multithreading, Embedded Systems
Cloud & DevOps: AWS, GCP, Microsoft Azure, Docker, Kubernetes, CI/CD Pipelines
Databases (DBs): MySQL, PostgreSQL, MongoDB, SQLite, Oracle
Source Control & Build Tools: Git, GitHub, Gradle, Maven, Makefile, CMake
Integrated Development Environments (IDEs): JetBrains, Eclipse, VS/VS Code
Graphics & Game Development: OpenGL, Vulkan, WebGL, Qt
AI & Natural Language Processing (NLP): LLMs, Prompt Engineering, RAG, LangChain, NLTK
Machine Learning (ML) & Data Science: OpenCV, PyTorch, TensorFlow, Pandas, NumPy, Matplotlib, SciPy, Jupyter
Cybersecurity: Penetration Testing, Vulnerability Assessment, Encryption, Network Security, Reverse Engineering
Operating Systems (OS): Windows, Linux (Ubuntu, Arch, Debian), macOS, FreeBSD, Android, iOS
Networking: TCP/IP, DNS, DHCP, VPNs, Firewalls, Load Balancing, Wireshark
IoT & Embedded Systems: Arduino, Raspberry Pi, ESP32
Project Management & Methodologies: Agile, Scrum, Kanban, Jira

Professional Experience

AI/LLM QA Expert – Chemistry, Biology, Math & Computer Science

Mercor & Meta

[Website](#) [LinkedIn](#)

Remote | Contract | April 2025 – Present

Conducted in-depth quality assurance testing on large language model outputs to ensure factual accuracy, coherence, and alignment.

Collaborated with cross-functional teams to identify edge cases, (in specific domains) and improved AI system responses through structured evaluation.

Applied testing protocols / grading rubrics to measure model performance across diverse content domains, contributing to safer and more reliable AI deployment.

Main Solutions Architect | Memphis Cult Music Group

[Website](#) [LinkedIn](#) [Spotify](#)

Remote | Contract | February 2025 – May 2025

Implemented a Demand-Side Platform (DSP) and lowered advertising costs by ~40% through real-time bidding (RTB) and precise audience targeting.

Technical Lead / Back-End SWE | Memphis Cult Music Group

[Website](#) [LinkedIn](#) [Spotify](#)

Remote | Part-Time | September 2023 – February 2025

Developed backend applications in Python and C++ (WinAPI/MFC), integrating MySQL databases.

Designed a revenue and payment system for artist payouts.

Implemented AI-driven music technology solutions using DeepSeek and AudioCraft.

Automated processes via Telegram bots and Spotify/DistroKid integration.

Led technical hiring, mentoring, and collaboration with creative teams.

Drafter / Design Engineer Intern | QMicrowave

[Website](#) [LinkedIn](#)

El Cajon, CA | Internship | May 2022 – August 2022

Designed RF and microwave components, including bandpass filters, for DoD communications.

Worked under ITAR regulations, handling confidential defense-related designs.

Developed test fixtures using AutoCAD and SolidWorks.

Contributed to L3Harris project initiation and LN2 environmental testing.

Projects

LaTeX Viewer App: A Python-based program that allowed me to print in LaTeX format, with a provided keyboard.

Voice Transcription App: A Python-based machine learning app for audio-to-text transcription. (On my LinkedIn)

Rubik's Cube Demo: A C++ program which uses OpenGL and GLSL shaders to render it.
(On my website)

Demand Side Platform (DSP): Lowered advertising costs by ~40% through real-time bidding (RTB)

Revenue/Payout System: Automates financial transactions for music labels.

Automated Telegram Bots: Integrated with MySQL databases for real-time artist management.

Computer Vision-Based Quality Control: Developed a vision system for part inspection.

Certificates

AWS Academy Graduate - Cloud Foundations

freeCodeCamp - Machine Learning With Python

Recognitions

Dean's List - University Of Massachusetts Lowell

 2023 - 2025
